

I am a Full-stack Software Engineer with a proven track record of building and delivering reliable high performance software applications. In my last position I was servicing more than 75+ customers across different technologies with a strong backend focus particularly on RESTful integrations. Comfortable in Agile environments I developed a growing interest in the JavaScript ecosystem, Backend Services and Cloud Architecture.

## Work Experience

<b>Board member</b>	<b>50PLUS partij</b> The Netherlands	<b>Mar 2024 - Present</b>
Together with other board members supervise the organization of 50PLUS partij and its various activities.		
<ul style="list-style-type: none"><li>Delivered comprehensive IT support and services for 50PLUS, ensuring all technical needs of the political party were met.</li><li>Managed and maintained the IT infrastructure and systems, ensuring their reliability and security.</li><li>Troubleshoot and resolve technical issues promptly, providing technical training and support to staff members.</li><li>Developed and implemented IT strategies aligned with the party's goals, planning and executing projects to improve operational efficiency.</li><li>Communicated IT advancements and updates to internal stakeholders, defining and implementing necessary actions based on their feedback.</li><li>Managed relationships with IT vendors and service providers.</li><li>Identified opportunities for technological innovation and implemented improvements to enhance IT services and capabilities.</li></ul>		
<b>Board member Noord-Brabant (Volunteer)</b>	<b>50PLUS partij</b> The Netherlands	<b>Dec 2022 - Mar 2024</b>
Together with other board members supervise the organization of 50PLUS party, mostly focused on IT. Managed multiple people under me as a manager.

<b>Financial Administrator (Volunteer)</b>	<b>Kastelijn Vastgoed</b> The Netherlands	<b>Aug 2019 - Dec 2024</b>
Together with other board members supervise the organization of 50PLUS party, mostly focused on IT. Managed multiple people under me as a manager.		
<ul style="list-style-type: none"><li>Oversee and manage budgets to ensure financial goals are consistently achieved and exceeded.</li><li>Prepare and maintain accurate financial reports, driving decision-making with timely income statements, balance sheets, and cash flow statements.</li><li>Track and categorize expenses to optimize financial performance and maintain compliance with policies.</li><li>Process payroll with precision, ensuring compliance with tax regulations and timely disbursements.</li><li>Ensure tax compliance by proactively preparing and submitting filings, avoiding penalties and maintaining transparency.</li><li>Analyze financial data to identify opportunities for cost-saving improvements and revenue growth.</li></ul>		

**Full-stack Developer****ID Freight****Nov 2021 - Present**

Breda, The Netherlands

Serviced internal customers from all parts of the country delivering new features and structures in an Agile environment:

- Creating an X-Dock management system which is rolled out to over 800+ internal users.
- Be a leading role in the merge of 2 software landscapes and defining which actions need to be taken.
- Making technical documentation and guidelines for the deployment process.
- Talk with internal stakeholders about the advancements in the IT department. Therefore defining which actions need to be taken and making sure those are being taken.

**Tech stack:** PHP, Laravel, JavaScript, TypeScript, Angular, Node.js, Docker, Kubernetes, AWS (EC2, S3), MySQL, Linux, Jira, Confluence, BitBucket, Gitlab, Redis, Bugsnag, Swagger, Open API, Github, Transpas, SQL Server

**Full-stack Developer****CM.com****May 2021 - Oct 2021**

Breda, The Netherlands

Serviced customers from all parts of the world delivering new features for digital signing in an Agile environment:

- Navigating and extending both current and legacy codebases in multiple stories. Implementing multiple new features and resolving multiple bugs in the system (PHP, JavaScript, Angular).
- Leading the development of a high performance order system(fullstack). The aim was to make it possible to have an automatic flow for ordering, saving up time efficiently.
- Researched multiple spikes which are needed to improve the organisation to another level. This included subjects like eIDAS, ISO certification and GDPR/AVG.
- Made it easier for newcomers to understand and start developing on our product. Therefore I pushed our team towards docker images and diagramming the most important flows.
- Helped transform the team from an Kanban environment towards an scrum environment as a shadow of the scrum master. The team now uses scrum in our daily processes.

**Tech stack:** PHP, Laravel, JavaScript, TypeScript, Angular, Node.js, Docker, Kubernetes, AWS (EC2, S3), MySQL, Linux, Jira, Confluence, BitBucket, Gitlab, Redis, Bugsnag, Swagger, Open API

**Full-stack Developer****MAX ICT B.V.****January 2019 - May 2021**

Tilburg, The Netherlands

Serviced 50+ corporate customers delivering full-stack features in an Agile environment:

- Designed and developed a web service integrating 75 + clients with our product feed handling different data formats and shapes(make it possible to get products into our system).
- Delivered a KPI dashboard giving visibility and live feedback to our logistics department, I led the full software lifecycle from concept to deployment and testing(data normalization and frontend client).
- Acted as a technical leader on multiple occasions, from onboarding new developers, to writing documentation and advocating for best practices across different teams and tech stacks.
- Integrated 20+ distributors with an electronic data interchange for automatic ordering, invoice and dispatch.
- Design a RESTful service enabling the integration with our third party partner (Lead Forensics) for lead generation, scoring and distribution (designing our own inhouse algorithm and integrating with CRM).
- Integrated a high-performance foreign exchange rate REST API that automatically calculated different product prices almost in real time and fed them into our system(adding minimum latency to the system).
- Collaborated with different multidisciplinary teams in an Agile environment and interacted with different stakeholders (tech and non-tech) across the company.
- Delivered a public interface for our REST APIs delivering CRM data (orders, RMAs, products) with the corresponding documentation, authentication and authorisation (OAuth2) and testing.

**Tech stack:** PHP, Laravel, JavaScript, TypeScript, Node.js, MySQL, Linux, Jira, Confluence, Redis, Bugsnag, Swagger, Open API

Serviced a whole range of customers delivering web development services:

- Designed and developed a continuous integration and deployment system with proper version control bridging our legacy systems and software delivery pipeline.
- Provided web development services for 30+ customers in the Netherlands market in a diverse technology stack.
- Building web apps for small local businesses, including deployment, hosting and integrating specific PHP plugins.
- Supporting my team and different stakeholders across the full software development life cycle from design, concept, implementation, deployment and testing.
- Due to excellent performance and results I was offered a contract extension and recognition in front of management.

**Tech Stack:** *Laravel, Wordpress, PHP, JavaScript, Git, jQuery, CSS, HTML5, MySQL, WooCommerce*

## Education and Certifications

---

- **Application Development**, Zoomvliet College, Roosendaal. **2011–2016**

## Technologies and Languages

---

- Languages: PHP, JavaScript, TypeScript
- Technologies: Node.js, Vue.js, AWS(EC2, S3), Git, Jira, Bitbucket, Gitlab, Laravel, Docker, Linux, RESTful API Design, Open API, Swagger, MongoDB, MVC
- Other: Data structures, Software Architecture, Design Patterns, CI/CD, OOP

## Certifications and Courses

---

- **Introduction to Kubernetes from the Linux Foundation**
- **ECDL/ICDL Advanced - European Computer Certificate**
- **CodeWithDragos Software Elite Training** - a 3 months long program covering professional aspects in software development. Worked together with professional developers on production-ready systems gaining professional skills (Software Design Principles, Microservices Architecture and API Design, CI/CD, Testing).
